## Memorandum of Understanding (MoU)

### Preface

The success of any educational institution of a country depends on optimum participation of parents, teachers, students and community. The teaching learning process starts from primary to higher level. One of the main objectives of higher education is to provide quality education to students and make them responsible citizens for the development of our society. This type of objective will be achieved if the institutions with similar aims and objectives come closer to share information and resources with each other for better growth and transformation. Collaborative activities will definitely help to identify the shortcomings, drawbacks and remedial measures. Thus, the institutions intend to collaborate with each other for the improvement of the students, community and society.
